## About Me

I'm Creative Director and Studious Engineer from Nantou, Taiwan, working in IT apartment. I am experienced Python developer, also familiar with linux shell script and JS, enjoy turning trifling process into simple, reliable Code.

Besides knowledge of coding, I also use piplen to make the exhausting build and deployment process become more efficient. On top of that, I am also a good coordinator in team work, too. Understand the position of Devops, and my aim is to bring Accurate, Automation, Safety to the sever side.

## What I do!

**Pipeline**

Experience in github action. Make changes to code that are then automatically tested and pushed out for delivery and deployment. [Check my website demo.](#)

**App Development**

Use React to structure front-end of my website, and Fastapi to develop my backend server. Build my api documentation and blog based on docusaurus.

**Monitor**

Experienced in monitor Software, such as Zabbix, Grafana, Elk.

**CDN**

Experienced in setting of Cloudflare, AWS Cloudfront. Use SSL for SaaS and rate limit rules to strengthen Website Information security.

**Cloud System**

Experienced in AWS and GCP.

**HTTP Server**

Be familiar with setting of Nginx, get used to check the official website of Nginx and Stack Overflow to get the answer, always conform to the request, well done!
